

When To Use

- For global functionality on the site.
- Buttons that can be seen wherever you browse.

Examples

Basic

```
import React from 'react';
import { FloatButton } from 'antd';

const App: React.FC = () => <FloatButton onClick={() =>
  console.log('onClick')} />;

export default App;
```

Type

```
import React from 'react';
import { QuestionCircleOutlined } from '@ant-design/icons';
import { FloatButton } from 'antd';

const App: React.FC = () => (
  <>
    <FloatButton icon={<QuestionCircleOutlined />} type="primary" style={{
      insetInlineEnd: 24 }} />
    <FloatButton icon={<QuestionCircleOutlined />} type="default" style={{
      insetInlineEnd: 94 }} />
  </>
);

export default App;
```

Shape

```
import React from 'react';
import { CustomerServiceOutlined } from '@ant-design/icons';
import { FloatButton } from 'antd';

const App: React.FC = () => (
  <>
    <FloatButton
      shape="circle"
      type="primary"
    />
  </>
);
```

```

        style={{ insetInlineEnd: 94 }}
        icon={<CustomerServiceOutlined />}
      />
    <FloatButton
      shape="square"
      type="primary"
      style={{ insetInlineEnd: 24 }}
      icon={<CustomerServiceOutlined />}
    />
  </>
);

export default App;

```

Description

```

import React from 'react';
import { FileTextOutlined } from '@ant-design/icons';
import { FloatButton } from 'antd';

const App: React.FC = () => (
  <>
    <FloatButton
      icon={<FileTextOutlined />}
      description="HELP INFO"
      shape="square"
      style={{ insetInlineEnd: 24 }}
    />
    <FloatButton description="HELP INFO" shape="square" style={{
insetInlineEnd: 94 }} />
    <FloatButton
      icon={<FileTextOutlined />}
      description="HELP"
      shape="square"
      style={{ insetInlineEnd: 164 }}
    />
  </>
);

export default App;

```

FloatButton with tooltip

```

import React from 'react';
import { FloatButton } from 'antd';

```

```
const App: React.FC = () => <FloatButton tooltip={<div>Documents</div>} />;

export default App;
```

FloatButton Group

```
import React from 'react';
import { QuestionCircleOutlined, SyncOutlined } from '@ant-design/icons';
import { FloatButton } from 'antd';

const App: React.FC = () => (
  <>
    <FloatButton.Group shape="circle" style={{ insetInlineEnd: 24 }}>
      <FloatButton icon={<QuestionCircleOutlined />} />
      <FloatButton />
      <FloatButton.BackTop visibilityHeight={0} />
    </FloatButton.Group>
    <FloatButton.Group shape="square" style={{ insetInlineEnd: 94 }}>
      <FloatButton icon={<QuestionCircleOutlined />} />
      <FloatButton />
      <FloatButton icon={<SyncOutlined />} />
      <FloatButton.BackTop visibilityHeight={0} />
    </FloatButton.Group>
  </>
);

export default App;
```

Menu mode

```
import React from 'react';
import { CommentOutlined, CustomerServiceOutlined } from '@ant-
design/icons';
import { FloatButton } from 'antd';

const App: React.FC = () => (
  <>
    <FloatButton.Group
      trigger="click"
      type="primary"
      style={{ insetInlineEnd: 24 }}
      icon={<CustomerServiceOutlined />}
    >
      <FloatButton />
    </FloatButton.Group>
  </>
);
```

```

      <FloatButton icon={<CommentOutlined />} />
    </FloatButton.Group>
    <FloatButton.Group
      trigger="hover"
      type="primary"
      style={{ insetInlineEnd: 94 }}
      icon={<CustomerServiceOutlined />}
    >
      <FloatButton />
      <FloatButton icon={<CommentOutlined />} />
    </FloatButton.Group>
  </>
);

export default App;

```

Controlled mode

```

import React, { useState } from 'react';
import { CommentOutlined, CustomerServiceOutlined } from '@ant-
design/icons';
import { FloatButton, Switch } from 'antd';

const App: React.FC = () => {
  const [open, setOpen] = useState<boolean>(true);
  return (
    <>
      <Switch onChange={setOpen} checked={open} style={{ margin: 16 }} />
      <FloatButton.Group
        open={open}
        trigger="click"
        style={{ insetInlineEnd: 24 }}
        icon={<CustomerServiceOutlined />}
      >
        <FloatButton />
        <FloatButton />
        <FloatButton icon={<CommentOutlined />} />
      </FloatButton.Group>
      <FloatButton.Group
        open={open}
        shape="square"
        trigger="click"
        style={{ insetInlineEnd: 88 }}
        icon={<CustomerServiceOutlined />}
      >
        <FloatButton />

```

```

        <FloatButton />
        <FloatButton icon={<CommentOutlined />} />
      </FloatButton.Group>
    </>
  );
};

export default App;

```

placement

API

Common props ref: [Common props](#)

This component is available since antd@5.0.0 .

common API

Property	Description	Type	Default	Version
icon	Set the icon component of button	ReactNode	-	
description	Text and other	ReactNode	-	

tooltip	The text shown in the tooltip	ReactNode () => ReactNode		
type	Setting button type	default primary	default	
shape	Setting button shape	circle square	circle	
onClick	Set the handler to handle click event	(event) => void	-	
href	The target of hyperlink	string	-	
target	Specifies where to display the linked URL	string	-	
htmlType	Set the original html type of button, see: MDN	submit reset button	button	5.21.0
badge	Attach Badge to FloatButton. status and other props related are not supported.	BadgeProps	-	5.4.0

FloatButton.Group

Property	Description	Type	Default	Version
shape	Setting button shape of children	circle square	circle	
trigger	Which action can trigger menu open/close	click hover	-	
open	Whether the menu is visible or not, use it with trigger	boolean	-	
closeIcon	Customize close button icon	React.ReactNode	<CloseOutlined />	
placement	Customize menu animation placement	top left right bottom	top	5.21.0
onOpenChange	Callback executed when active menu is changed, use it with trigger	(open: boolean) => void	-	

onClick	Set the handler to handle click event (only work in Menu mode)	(event) => void	-	5.3.0
---------	--	-----------------	---	-------

FloatButton.BackTop

Property	Description	Type	Default	Version
duration	Time to return to top (ms)	number	450	
target	Specifies the scrollable area dom node	() => HTMLElement	() => window	
visibilityHeight	The BackTop button will not show until the scroll height reaches this value	number	400	
onClick	A callback function, which can be executed when you click the button	() => void	-	

Design Token
